

TRI-LIFT NJ **PLANNED MAINTENANCE SUMMARY**

What's different about a Tri-Lift NJ PM Agreement?

MORE THAN JUST PREVENTATIVE

A Tri-Lift NJ PM agreement goes beyond simply extending the life of your trucks. Besides being properly serviced and maintained to exact factory recommendations, a key component of this program is identifying and correcting potential problems long before they become catastrophic failures. Also, clear and concise communication ensures you are always in complete control of your forklift maintenance.

Advantages

DETAILED EQUIPMENT INSPECTIONS

Our technicians perform a thorough review of each piece of equipment. This ensures that there are no hidden problems, and that your machine is up to code with stringent OSHA requirements.

BUILT AROUND YOU

We understand you have enough to manage in your day to day schedule. That's why we will always call in advance and schedule your PM before we come out.

GET MORE FROM LESS

We monitor the hours of each and every piece of equipment in your fleet. This means that only machines which truly require PM maintenance will be serviced when we visit.

ACTIVE MONITORING

Upon your request, we will provide a cost summary on each piece of equipment we service. This includes the cost of Tires, Repairs, Damage, and PM's. You can then identify when and which machines should be Relocated, Retained, Retired or Replaced.

Procedure

If during a PM visit our service technician discovers a potential problem, this is what you can expect.

Our technician will make you aware of the concern and the level of severity. If you wish to have the problem corrected, an estimate of time and materials needed to complete the job can be provided to you. Or if you prefer, the technician can perform the repairs on the spot with your approval.

Cost

PM Rates are based on the amount of trucks, the type of trucks, and the type of Preventative Maintenance service being performed. Refer to the PM Service Schedule for pricing. We're here to help! Discuss with your representative what type of plan works for you.
